1. The following is an examiner's statement of reasons for allowance:

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed method as set forth in independent claim 7 that is particularly characterized at least by the claimed method steps of "transmitting a second impulse radio signal from the first location"; "receiving the second impulse radio signal at the second location"; "generating a second waveform which ..."; and "comparing the first waveform and the second waveform to determine whether there is a change ..." taken together and taken in the overall context of independent claim 7.

Dependent claims 8-10 are allowable for at least the reasons for which claim 7 is allowable.

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed method as set forth in independent claim 11 that is particularly characterized at least by the claimed method steps of "generating a second waveform which is a time domain representation of a received second impulse radio signal that indicates a multipath structure of a propagation channel of a transmitted second impulse radio signal" and "comparing the first waveform and the second waveform to determine whether there is a change between the first waveform and the second waveform indicative of an intruder entering a protection zone" taken together and taken in the overall context of independent claim 11.

Dependent claims 12-14 are allowable for at least the reasons for which claim 11 is allowable.

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed method as set forth in independent claim 15 that is particularly characterized at least by the claimed method steps of "generating a plurality of waveforms, each of the plurality of waveforms being time domain representations of one of the plurality of impulse radio signals received at the second location that indicates a multipath structure of a propagation channel of the corresponding one of the transmitted plurality of impulse radio signals" and "comparing two of said plurality of waveforms to determine whether ..." taken together and taken in the overall context of independent claim 15.

Dependent claims 16-18 are allowable for at least the reasons for which claim 15 is allowable.

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed apparatus as set forth in independent claim 19 that is particularly characterized at least by the claimed "receiving impulse radio unit for receiving ..." and "processor for comparing ..." taken together and taken in the overall context of independent claim 19.

Dependent claims 20-24 are allowable for at least the reasons for which claim 19 is allowable.

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed apparatus as set forth in independent claim 25 that is particularly characterized at least by the claimed "processor for generating a second waveform ..." and "processor for comparing ..." taken together and taken in the overall context of independent claim 25.

Dependent claims 26-28 are allowable for at least the reasons for which claim 25 is allowable.

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed apparatus as set forth in independent claim 29 that is particularly characterized at least by the claimed "first receiving impulse radio unit ..." and "processor for generating a plurality of waveforms ... for comparing two of said plurality of waveforms to determine ..." taken together and taken in the overall context of independent claim 29.

Dependent claims 30-33 are allowable for at least the reasons for which claim 29 is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. These changes are merely editorial for issuance and printing purposes, so authorization from Applicants' attorney was not sought.
